

A<sup>2</sup>

1. (Amended) An inflatable device, comprising:  
a substantially fluid impermeable bladder comprising a recess sized to  
accommodate at least a portion of <sup>a</sup> ~~the~~ fluid controller; and  
~~the~~ a fluid controller comprising an electrically powered pump and at least partly  
positioned within the recess.

---

A<sup>3</sup>

19. (Amended) A combination of a fluid controller comprising an electrically  
powered pump and an inflatable bladder, comprising:  
the fluid controller connected to the inflatable bladder such that the exterior  
profile of the fluid controller and inflatable bladder in combination is essentially the same as  
the exterior profile of the inflatable bladder.

---

A<sup>4</sup>

27. (Amended) An inflatable device, comprising:  
a substantially fluid impermeable bladder;  
a fluid controller comprising:  
an electrically powered pump, and  
a self-sealing valve; and  
an adjustment device, comprising:  
a first switch electrically connected to the pump and a power source such  
that the first switch may selectively energize the pump, and  
a second switch electrically connected to a power source and  
electro-mechanically connected to the self-sealing valve of the fluid controller such that  
it may selectively open the self-sealing valve.

28. (Amended) The inflatable device of claim 27, wherein the electro-mechanical  
connection comprises a solenoid.
